SR18

SR10/30

SR25

FEATURES

- Compact design
- Quick change of cassette (SR10)/tubing (SR25, SR18)
- Endless tubing possible (SR10)
- Self priming
- Safe to run dry
- Maintenance free
- Different tubing materials

TYPICAL APPLICATIONS

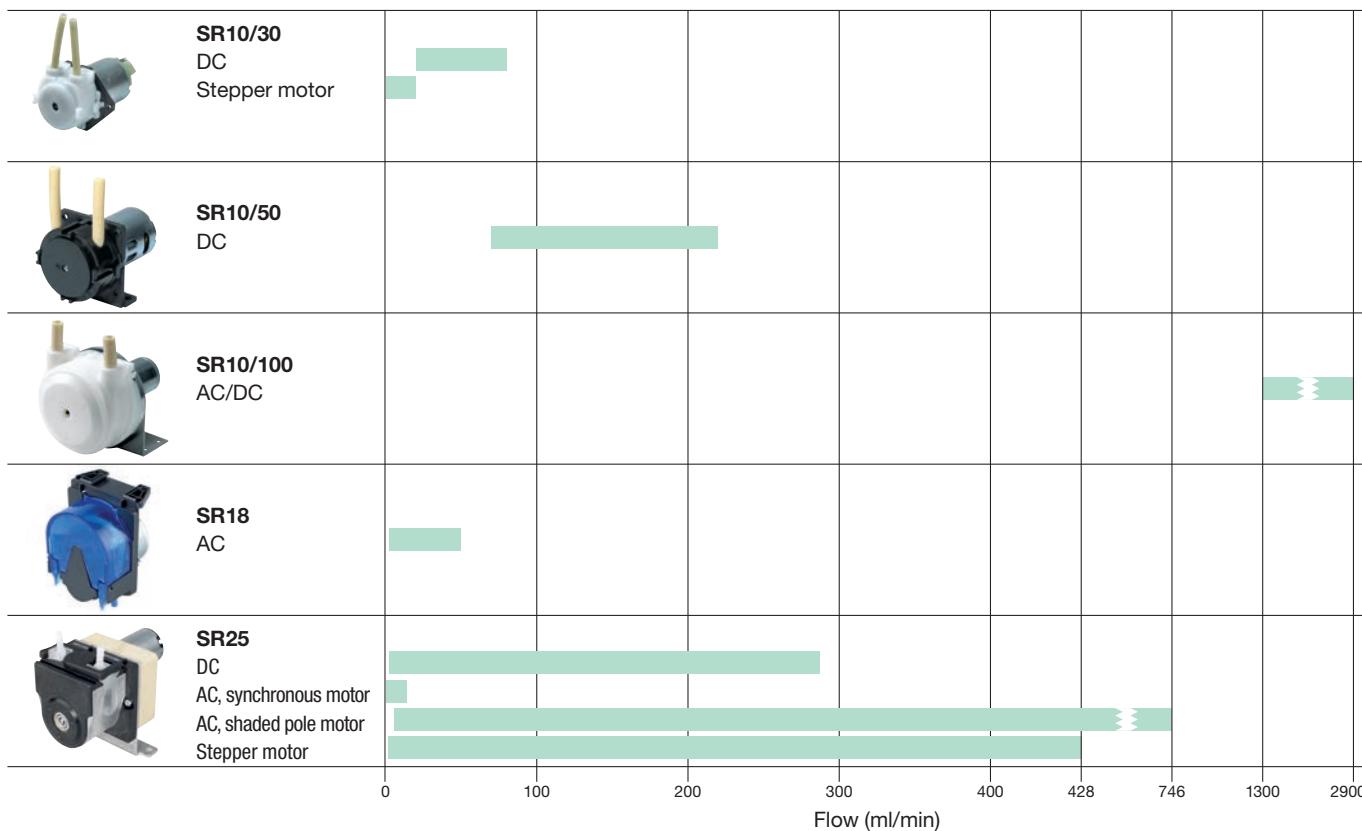

- Chemical industry
- Medical industry
- Laboratory and analysis technology
- Food sector
- Hygiene, disinfection
- Industrial dishwasher
- Glass washing

¹⁾ pumps with sequencer

Peristaltic Pumps

Series SR10

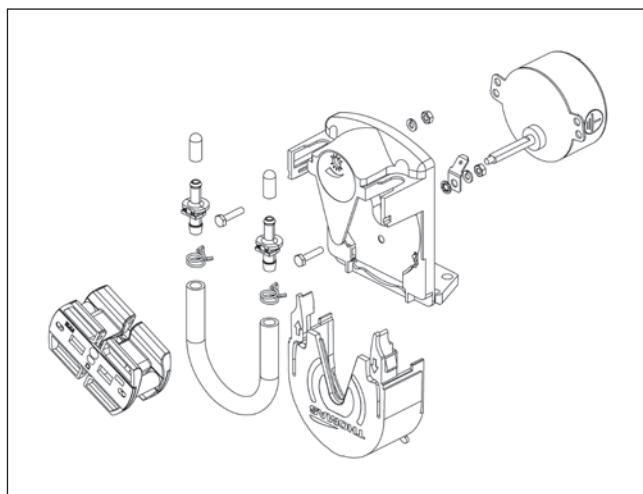

- Speed reduction through frictional connection from the motor shaft to the rollers.
- Very simple construction with the use of few parts only.
- Easy change of the cassette.
- Generally 3 rollers.
- For short time operation only.
- If the pump is stored longer than three months, we recommend to take the cassette off the motor shaft and store it separately.
- Different motors available (DC, low cost DC, AC and stepper motor).

Series SR18

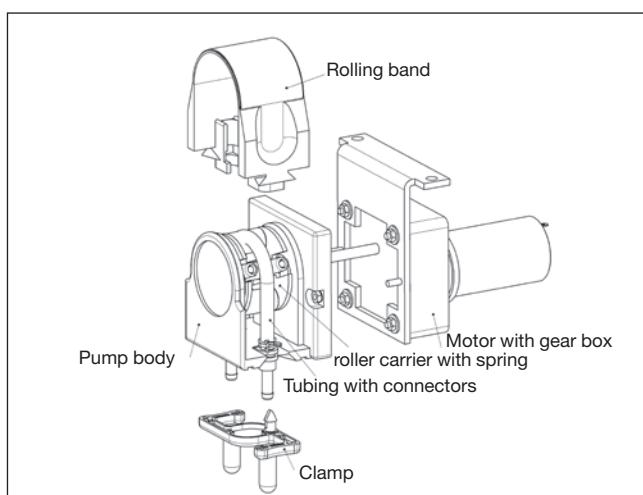

- Peristaltic pump with QuiXchange system
- Tube exchange without tooling within seconds
- Spring loaded roller carrier with two rollers for extremely long durability
- Optional „sequencer“ for flow adjustment
- AC-motor

Series SR25

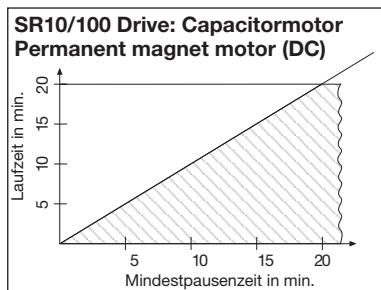

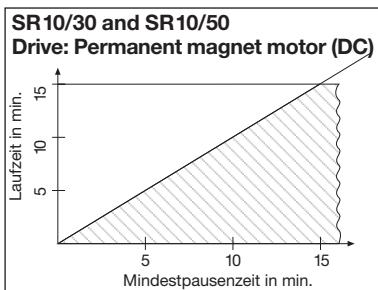

- Protection of the tubing due to spring loaded rollers and guiding side rollers.
- Quick and easy change of the tubing.
- Roller carrier with two rollers.
- Also suitable for continuous operation, depending on the drive.
- If stored longer than three months, we recommend to remove the tubing.
- Different gear motors available (DC, AC and stepper motor).

Recommended rotating direction at continuous operation			Clockwise	
Electrical Data				
Nominal voltage (drive through electronic board)			24 V DC or 20 V AC	
Motor			Stepper motor, bipolar, stepping angle 1,8°	
Current consumption			0,8 A	
Max. restart consumption			5 A*	
Inductance at 1 kHz, 1 V			14 mH	
Winding resistance			6 Ω	
Motor insulation class			B	
General Data				
Material of the hose clip			PVDF	
Weight of the pump			0,5 kg	

* Delay fuse to be used.

- 1) Option: 200 mm 14-pole connecting cable with plug,
rocker switch for clockwise and lefthanded running
Potentiometer and speed-push-button, part number 29000702

2) Note: The indicated values are average measured with water.
The actual values depend on different parameters like quality
and age of tubing, pressure of tubing beds, pressure ratios,
viscosity, etc. (max deviation ± 10%)
Please see page 4 for recommended running times and
general data.

Peristaltic Pumps SR25 - Adjustable

Synchronous motor

Flow 0,2 – 21 ml/min

**SR25 – adjustable²⁾
plastic housing
with synchronous motor
(for wall fastening)**

Synchronous motor

Voltage: 230 V/50 Hz

Power consumption: 7,5 W

Tubing: Novoprene

Pressure height: max. 10 m H₂O

Suction height: max. 8 m H₂O

Flow range ¹⁾ ml/min	Tubing wall thickness Ø x mm	Part number with plastic housing
0,2 – 21	N 4,8 x 1,6 mm	20252402

EMC guide line

Interference resistance according to EN 50082-1

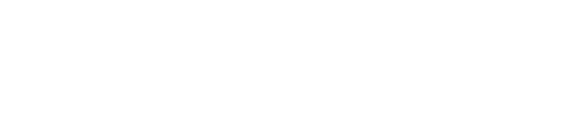

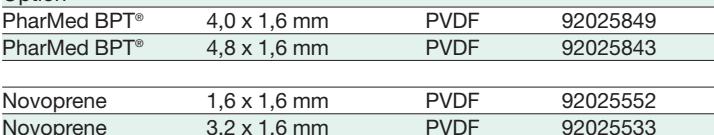

Emitted interference according to EN 55011 B

1) Note: The indicated values are average measured with water.
The actual values depend on different parameters like quality
and age of tubing, pressure of tubing beds, pressure ratios,
viscosity, etc. (max deviation ± 10%)
Please see page 4 for recommended running times and
general data.

2) Note: Instruction manual available in English and German. Other
languages on request.

Peristaltic Pumps

Tubing Properties

Tube	Characteristics	Limitations
Novoprene	Standard tubing for the SR10/30, SR10/50 and SR25 Long lifetime Wide range of applications	May swell up with oil or oily liquids
Norprene®	Standard tubing for the SR10/100 Long lifetime Suitable especially for alkaline solutions	
PharMed BPT®	High quality for medical, laboratory and research use Homogeneous structure and therefore comparatively better chem. resistance Autoclavable Biocompatible Long lifetime Suitable for mineral, vegetable and animal oil	Expensive
Silicon	Suitable for polar solvents (with the exception of chlorinated aliphatic and aromatized hydrocarbon) No detachment of softening agents Very stable elasticity over a wide temperature range (-30 bis 180 °C)	Not recommended with strong acids or alkaline solutions Swells up in many organic solutions

Choice of tubing depending on flow medium

		Novoprene	Norprene®	PharMed BPT®	Silicon
Acids	weak medium strong		very good good not recommended		good unsatisfactory not recommended
Alkaline solution	weak medium strong	very good good not recommended		very good very good good	good unsatisfactory not recommended
Hydro-carbons	aliphatic aromatized halogenated			not recommended	
Standards/ physiological behaviour		basis material meets FDA (21 CFR 177.2600) doesn't fulfill the EU food requirement 2002/72/EC	not recommended for food, drinks or medicine	USP, class VI FDA (21 CFR 177.2600) NSF	physiologically inert
Chemical structure		thermoplastic elastomer on PP-Basis with cross linked EPDM parts	thermoplastic elastomer on PP-Basis	thermoplastic elastomer on PP-Basis	high cross linked Polysiloxane with anorganic fillers
